QUALITY SILICA

MINED IN AMERICA™

MS Industries' silica products are proudly **MINED IN AMERICA™** and bear the trade name that exemplifies excellence in mining and mineral production.

WHOLE GRAIN SILICA PRODUCTS

● High Purity ● High Temperature Resistance ● Low Moisture ● Inert

Customized Fractions

-40+70 Mesh

-70+140 Mesh

Mesh Size*	SiO ₂ Content	Moisture Content
-40+70	> 97%	0.25%
-70+140	> 98%	0.25%
*Customized fractions available upon request		

INDUSTRIAL APPLICATIONS AND USES

- Thermal Oil Well Cementation
- Foundries
- Rubbers and Plastics
- Colored Glass/Bottles
- Fiberglass Insulation
- Abrasives
- Frit Ceramics
- Filtration
- Traction and Transportation
- Recreation Sand
- Coastal and Wildlife Habitat Restoration
- Building Products

MS Industries mines and processes its resources in America.

SILICA FLOUR PRODUCTS

MS Industries is equipped to produce silica flour in both -200 and -325 meshes. With uses in oil and gas exploration, manufacturing of plastic/rubber and other industries, MSI's high-purity silica flour includes several benefits.

Mesh Size	SiO ₂ Content	Fe ₂ O ₃ Content	Moisture Content
-200	> 98%	< 0.25%	0.25%
-325	> 98%	< 0.25%	0.25%

MSI Silica Flour Benefits

- Performs in deep, high-temperature and high-pressure oil well conditions
- Maintains the life of oil wells and provides structural integrity
- Establishes a predictable time schedule for thickening in oil wells
- Adds high strength and durability to rubber and plastic products

LOGISTICS

MSI's silica products are mined and processed in safe working conditions and produced through a highly-compensated workforce. With a state-of-the-art laboratory, our geologists and lab personnel ensure that our silica products meet the highest quality standards. Our product orders can be fulfilled in bulk, super sacks, and barrels/bags (which may require special handling), and are deliverable in the continental United States by truck, water and rail. International bulk orders are fulfilled through intermodal containers.

About MS Industries

MS Industries (MSI) is a research and mining development company, and a direct mining source. MSI is a primary producer of a wide array of industrial silica products. Our team, comprised of mining and mineral experts, as well as processing and logistics professionals, can arrange the delivery of our silica products by truck, rail or water. Owning millions of tons of high grade silica, MS Industries is a long-term partner to numerous industries requiring vital mineral resources.

MSI mines and prepares some of the finest silica available using stringent, environmentally-conscious processes in the United States. That's why we are proud to say that our products are **MINED IN AMERICA™**. Our staff of geologists and laboratory personnel rigorously review necessary specifications to ensure customer needs are met to the highest quality and standards.
